

## **ORBIS NEWS FLASH!**

**August 26, 2015** – ORBIS was awarded an \$18.9 Million Prime contract to provide Scientific and Engineering Services for the U.S. Army Aberdeen Test Center (ATC). This work will start immediately. Work will be performed at the ATC in Aberdeen Proving Ground, Maryland and contractor facilities in Arizona, Maryland and South Carolina. In this role, ORBIS will develop and enhance instrumentation designs, fabricate small quantity instrumentation prototypes, provide instrumentation user manuals, and design and install test facilities. ORBIS will provide routine engineering services in support of testing activities and test facilities and instrumentation; on-site instruction and user manuals for proper use and operation of the equipment and systems it designs, fabricates or installs; and document lessons learned in the course of design, fabrication, and testing of instrumentation for consideration by the government subject matter experts for future designs. The contract is worth \$18.9 Million for the first two years with a total value of \$47.5 M if all options are exercised over 5 years. This award is a huge win for our lab, much kudos goes to the Charleston office and the hard work that went into solidifying this award.

\*\*Special thanks to Vickie Hoffmann for identifying this opportunity almost 2 years ago.

***Congratulations!***
